
uctime_t error

Posted by vasconce1o - 2008/04/10 12:00

When I test this example:

```
uctime_t utcTime;

utcTime.setYMD(8,2,1);
utcTime.setHMS(13,12,10);
cout
```

Are you including the date_time library in your build?

If you look at the example directory Jamfile, you'll see the requirement:

```
project : requirements
$(BOOST_ROOT)
../..../
$(BOOST_ROOT)/libs/date_time/build//boost_date_time
BOOST_ALL_NO_LIB=1
;
```

Re:uctime_t error

I do this:

```
using namespace std;

#include

using namespace boost;
using namespace asn1;

int main()
{
uctime_t utcTime;

utcTime.setYMD(8,2,1);
utcTime.setHMS(13,12,10);
cout
```

Re:uctime_t error

and I #include too.

okay, good. Now you can encode data to transmit over a socket. Take a look at Boost.ASIO, or look at the query.cc example.

Post the code, comment it with what you are trying to do and I'll take a look at it.

Re:uctime_t error

I am doing this:

```
#include
#include

using namespace std;
using namespace boost;
using namespace asn1;

int main()
{
    utctime_t utcTime;

    utcTime.setYMD(8,2,1);
    utcTime.setHMS(13,12,10);
    cout
```

I already can find my mistake.
I do not linked to the library libboost_date_time.
Sorry.
